AUTHOR INDEX*

Volumes 35 to 39—1971 to 1975

Adelberg, Edward A., 37:197
Amelunxen, Remi E., 37:320

Bachmann, Barbara J., 36:525
Baltimore, David, 35:235
Bergan, Tom, 35:379
Bishop, C. T., 38:222
Blank, F., 38:222
Blumberg, Peter M., 38:291
Brock, Thomas D., 35:39

Carpenter, C. C. J., Jr., 35:1
Chater, Keith F., 37:371
Cheng, K.-J., 38:87
Cho, Cheng T., 37:1
Chopan, Michael, 38:337
Clarke, Colin H., 39:33
Clowes, Royston C., 36:361
Cohen-Bazire, G., 35:171
Collier, R. John, 39:54
Collins, Frank M., 38:371
Costerton, J. W., 38:87
Crawford, Irving P., 39:87
Cronan, John E., Jr., 39:232

Dales, Samuel, 37:103
Dalton, Howard, 36:231
Davis, Francis M., 37:197
Docherty, John J., 38:337
Dowding, John E., 37:371
Drlica, Karl A., 39:186

Fuccillo, David A., 37:19
Flick, John, 36:311
Fox, Eugene N., 38:57

Gelmann, E. P., 39:232
Gibbs, Clarence J., Jr., 39:169
Gopinathan, K. P., 36:65
Gordon, Helmut A., 35:390
Goren, Mayer B., 36:33
Grappel, S. F., 38:222
Greenawalt, John W., 39:405
Greenough, W. B., 35:1

Halliday, W. J., 35:267
Hamilton-Miller, J. M. T., 37:166
Hardy, Kimber G., 39:464
Harold, F. M., 36:172
Hartwell, Leland H., 38:164
Heberling, R. L., 35:310
Hemphill, H. Ernest, 39:257
Henrichsen, Jørgen, 36:478
Henriksen, Sverre Dick, 37:522
Hoeniger, Judith F. M., 37:479

Hooks, John J., 39:169
Hopwood, David A., 37:371
Horvath, Raymond S., 36:146
Houghton, M., 38:356
Hungate, Robert E., 35:231
Husain, Intisar, 37:136

Ingram, J. M., 38:87

Jurand, Arthur, 38:113

Kado, Clarence I., 39:186
Kahan, Barry D., 35:59
Kalter, S. S., 35:310
Kandler, Otto, 36:407
Kidby, Denis K., 39:197
Kingsley, V. Victor, 37:479
Kline, Kimberly, 37:453
Knox, K. W., 37:215
Koltin, Y., 36:156
Kozak, Marilyn, 36:109
Kunisawa, R., 35:171

Lacey, R. W., 39:1
Lamanna, Carl, 35:242
Lanyi, Janos K., 38:272
Lechevalier, Hubert, 36:135
Lemke, P. A., 36:156
Lemke, Paul A., 38:29
London, Jack, 37:453
Lovett, James S., 39:345
Low, K. Brooks, 36:587

McClung, L. S., 38:251
McFadden, Bruce A., 37:289
MacKenzie, J. S., 38:356
Makela, P. Helena, 36:608
Mandel, M., 35:171
Maniloff, Jack, 36:263
Meyer, K. F., 38:251
Morita, Richard Y., 39:144
Morowitz, Harold J., 36:263
Mortenson, Leonard E., 36:231
Murthy, P. Suryanarayana, 36:65

Nash, Claude H., 38:29
Nathans, Daniel, 36:109
Necas, C., 35:149
Norris, Robert F., 37:136

Ornston, L. N., 35:87

Pace, Norman R., 37:562
Padan, Etana, 37:343
Payne, W. J., 37:409
Pesti, Laszlo, 35:390
Pierce, N. F., 35:1
Porter, J. R., 37:284

* Cumulative author and subject indexes to volumes 27-34/70 were published in the December 1970 issue.

Poupard, James A., 37:103

Wolk, Peter, 37:32

Ziegler, Lilja, 36:608

SUBJECT INDEX*

Volumes 35 to 39—1971 to 1975

Acetamide pathway
  in *Pseudomonas*, 35:87
Acinetobacter
  nomenclature, 37:522
  taxonomy, 37:522
Activated macrophages, 38:378
Adenosine triphosphate
  role in N_2 fixation, 36:246
Adenoviruses
  serological infection, 35:310
Adjuvants
  role in cell-mediated immunity, 38:392
Aldolase of lactic acid bacteria
  enzyme use as an evolutionary marker, 37:453
Algae
  blue-green, 35:171
Allograft rejection, 35:59
Allosteric interactions in thermophilic microorganisms, 37:320
Animal viruses
  genetic system, 35:235
Antibiotic resistance plasmids
  of *S. aureus*, 39:1
Antibiotics
  action of rifamycins, 35:290
  polyene macrolide, 37:166; see Erratum, 37:407
Antibody
  macrophage-cytophilic, 35:365
Antibody action
  in cell-animal virus interactions, 37:103
Antibody of immediate-type hypersensitivity, 36:311
Antigen
  S. flexneri O-antigen, 35:117
Antigen extraction, 35:59
Antilymphocytic serum, 35:267
Antimutagenesis
  genetic, 39:42
  in microbial systems, 39:33
  physiological, 39:34
Aphanocapsa, 35:171
Arboviruses
  serological evidence, 35:310
Attachment
  in cell-animal virus interactions, 37:103
Autotrophic CO_2
  assimilation, 37:289
  fixation, 37:289
Azoferredoxin
  function in N_2 fixation, 36:248
Azotobacter vinelandii
  encystment, 39:516
  germination, 39:516

Bacillus subtilis
  bacteriophages of, 39:257

Bacterial cell division, 38:199
Bacterial cell envelope
  biosynthesis, 35:14
Bacterial membranes
  conservation of energy by, 36:172
  energy transformations in, 36:190
Bacterial plasmids, 36:361
Bacteriology
  beginnings in California, 38:251
Bacteriophage genes
  products, 36:112
Bacteriophage protein synthesis
  in *E. coli* extracts, 36:117
  in infected cells, 36:114
  regulation of, 36:119
Bacteriophages
  genetics of *B. subtilis*, 39:279
  host-related functions, 39:271
  major groups of *B. subtilis*, 39:258
  synthesis during development, 39:289
Bassi, Agostino, bicentennial (1773–1973), 37:284
Bifidobacteria
  biochemical characteristics of, 37:136
  biology of, 37:136
  classification of, 37:136
  ecology of, 37:136
  morphology of, 37:136
  physiological characteristics of, 37:136
Biochemical co-metabolism, 36:146
Biosynthetic pathways, 38:1
Blastocladiella emersonii
  growth and differentiation, 39:345
  microcyclic sporogenesis, 39:345
  ribonucleic acid and protein synthesis, 39:345
Blue-green algae
  cyanophage attack of, 37:343
  cytological chemistry of, 37:32
  evolution of, 37:32
  gas vacuoles in, 36:1
  nomenclature, 35:171
  photoautotrophic metabolism of, 37:343
  physiology of, 37:32
  purification and properties of, 35:171
Botulinal toxins
  problems of nomenclature, 35:242

California
  beginnings of microbiology, 3:251
Camphor pathway
  in *pseudomonas*, 35:87
Carbohydrate metabolism
  in mycobacteria, 36:65
Catabolic pathways
  in *Pseudomonas*, 35:87
  regulation of, 35:87
Cation specificity
  salt-dependent proteins, 38:280
Cell-animal virus interactions
  antibody action, 37:103

* Cumulative author and subject indexes to volumes 27-34/70 were published in the December 1970 issue.

attachment in, 37:103
cellular membranes, fusion, lysis, and repair of, 37:103
electron microscopy of, 37:103
genome replication, 37:103
host-dependent modifications, 37:103
inoculum vectorial movement, 37:103
lysosome role in infection, 37:103
phagocytosis, 37:103
subviral components, 37:103
uncoating, 37:103
virion-associated enzyme activities, 37:103
virus-dependent modifications, 37:103
Cell biology of mycoplasmas, 36:263
Cell division, control of, 38:199
Cell-division cycle, 35:39
Cell envelope
biosynthesis, 35:14
Cell envelope of gram-negative bacteria, 38:87
cytoplasmic membrane, 38:87
external layers, 38:96
peptidoglycan-lipoprotein complex, 38:89
periplasmic zone, 38:92
Cellular lipids, 39:198
Cellular membranes, fusion, lysis, and repair
in cell-animal virus interactions, 37:103
Cell wall
synthesis in yeast protoplasts, 35:149
Cell walls
peptidoglycan types, 36:407
Cell wall synthesis
control, 38:326
effect of penicillin, 38:326
Cellular immunity
mediators, 38:376
role of virulence factors, 38:373
to intracellular parasites, 38:372
Chemical markers
of transplantation antigens, 35:59
Chemical N_2
fixation, 36:250
Childhood cancer
influenza infections in pregnancy, 38:365
Chlorogloea, 35:171
Chlorogloeopsis, 35:171
Cholera enterotoxin
mode of action, 35:1
Chromosomes
aberrations in mycoplasma-infected cultures, 35:206
Chroococcales
nomenclature, 35:171
purification and properties, 35:171
Clinical applications
rifamycins, 35:290
Colicinogeny
ecology of, 39:464
effects of sensitive bacteria, 39:464
factors, 39:464
relationship between fertility systems, 39:464
survival in bacterial cells, 39:464
Co-metabolism
biochemical, 36:146
Comparative virology of primates, 35:310
Congenital malformations
circulatory, 38:360
cleft lip, 38:361
CNS, 38:357
relation to influenza during pregnancy, 38:356
Congenital malformations, viral
in animals, 37:19
in humans, 37:19
Conservation of energy
by bacterial membranes, 36:172
Contamination
with mycoplasmas, 35:206
Control of cell division, 38:199
Control of cell wall synthesis, 38:326
Crown gall tumors, 39:186
Cyanophages
attacking blue-green algae, 37:343
Cytology of mycoplasmas, 36:264
Cytophilic antibodies, 35:365

Degradation of organic compounds, 36:146
Delayed-type hypersensitivity
relationship to immunity, 38:387
Deoxyribonucleic acid
of blue-green algae, 35:171
Dermatophytes
immunochemistry, 38:231
immunoprophylaxis, 38:240
Dermatophytosis
acquired resistance, 38:223
antibodies, 38:228
dermatophytid eruptions, 38:227
hypersensitivity, 38:225
nonspecific resistance, 38:230
Diarrheagenic toxins
from enteric organisms, 35:1
Dicarboxylic acids
in *Pseudomonas*, 35:87
Differentiated state analysis
by use of somatic cell hybrids, 37:197
Dinitrogen fixation
by whole cells, 36:231
Diphtheria toxin
biological function and origin of, 39:77
mode of action and structure, 39:54
structure-activity relationships, 39:63
DTH
relationship to immunity, 38:387

Electron transport
in mycobacteria, 36:65
Electrostatic interactions
salt-dependent proteins, 38:273
Endogenous control, 38:1
Endosymbionts of *Paramecium aurelia*, 38:113
Energy conservation
by bacterial membranes, 36:172
Energy transductions
in mitochondria, 36:175
Energy transformations
in bacterial membranes, 36:190
Enterotoxin
Vibrio cholerae, 35:1

Environmental pollutants
co-metabolism of, 36:150
Enzyme synthesis
control mechanisms, 38:1
pathways, 38:1
precursor pools, 38:1
Epizootiology
of monkeypox virus, 37:1
Escherichia coli
antigenic comparison to *Shigella*, 35:117
Escherichia coli K-12
F′ factors, 36:525
linkage map, 36:504
pedigrees of mutant strains, 36:525
Escherichia coli mutant strains
pedigree charts, 36:525
Eye
latent herpesvirus, 38:341

Fatty acid biosynthesis
in mycobacteria, 36:33
Fatty acids
of blue-green algae, 35:171
Fertility system
S. coelicolor, 37:37
F′ factors
of *E. coli*, 36:525
Foamy viruses
classification and nomenclature, 39:170
distribution in vivo, 39:178
history, 39:170
properties of, 39:170
replication, 39:175
sero-epidemiology, 39:181
F^+ strains
of *Salmonella abony*, 36:608
of *Salmonella tyhpimurium*, 36:608
F′ strains
of *Salmonella abony*, 36:608
of *Salmonella typhimurium*, 36:608
Fungal viruses, 38:29
biochemistry, 38:29
discovery, 38:29
distribution, 38:29
replication, 38:37
structure, 38:32
transmission, 38:46
virulence, 38:39
Fungi, higher
genetic structure, 36:156
life cycles, 36:156
sexual progression, 36:156

Gas vacuoles
structure and function, 36:1
Genetic structure
of bifactorial incompatibility, 36:161
of the higher fungi, 36:156
of unifactorial incompatibility, 36:161
Genetic studies of cell division, 38:204
Genital area
latent herpesvirus, 38:341
Genome of RNA-containing viruses
translation of, 36:109
Genome replication
in cell-animal virus interactions, 37:103
Genome ribonucleic acid, 35:250
Glycerophosphatides
in lipopolysaccharide biosynthesis, 35:14
Glycolipids, 36:42
Glycosyl carrier lipids
role in cell envelope biosynthesis, 35:14
Gnotobiotic animals, 35:390
Graft compatibility, 35:59
Gram-negative bacteria
cell envelope, 38:87
enzymes of cell wall components, 38:100
function of cell wall enzymes, 38:101
synthesis of cell wall, 38:97
Grouping
numerical techniques for, 35:379
Growth rates, microbial, 35:39

Halobacteria
gas vacuoles, 36:1
Halophilic bacteria
extreme, 38:272
Hepatitis virus
serological evidence, 35:310
Heterotrophc bacteria
gas vacuoles, 36:1
Herpes simplex virus
latent, 38:337
Herpesviruses
serological evidence, 35:310
Hexose pathway
in *Pseudomonas*, 35:87
Hfr strains
of *Salmonella abony*, 36:608
of *Salmonella typhimurium*, 36:608
Higher fungi
genetic structure, 36:156
life cycles, 36:156
sexual progression, 36:156
Host- and virus-dependent modifications
in cell-animal virus interactions, 37:103
Host metabolism
in mycoplasma-infected cultures, 35:206
Host-microbial relationships, 35:390
Human reagins, 36:311
Hydrophobic effects
salt-dependent proteins, 38:281
Hydroxyproline pathway
in *Pseudomonas*, 35:87

Immediate-type hypersensitivity, 36:311
Immune response
suppression by microorganisms 39:121
Immunity in dermatophytosis, 38:223
Immunochemistry
of *S. flexneri* O-antigen, 35:117
Immunogenicity of cell components, 38:390
Immunoglobulins
bound to macrophages, 35:365
Immunological paralysis
induced in mice, 35:267
Immunology of dermatophytes, 38:222
Immunology of teichoic acids, 37:215

Inactivated whole-cell vaccines, 38:389
Incompatibility factors
in higher fungi, 36:156
Infection
in gnotobiotic animals, 35:390
Influenza infections during pregnancy
association with congenital malformations, 38:356
subsequent neoplasms, 38:356
Influenza virions
structure, 35:250
Influenza virus
genetics, 35:250
protein synthesis, 35:250
RNA synthesis, 35:250
Inoculum vectorial movement
in cell-animal virus interactions, 37:103
Intracellular parasites
immunity to, 38:372
Ivanovski, Dmitri Iosifovich
biographical sketch, 36:135

Kappa endosymbionts
Paramecium aurelia, 38:113
α-Ketoacid pathways
in *Pseudomonas*, 35:87
β-Ketoadipate pathway
in *Pseudomonas*, 35:87
α-Ketoglutarate pathways
in *Pseudomonas*, 35:87
Killing by penicillins, 38:324

Lactic acid bacteria aldolase,
enzyme use as an evolutionary marker, 37:453
Lambda endosymbionts of paramecia, 38:119
Latent herpes simplex virus, 38:337
Latent herpesvirus and cancer, 38:345
Latent virus location, 38:341
Linkage map
E. coli K-12, 36:504
Salmonella typhimurium, 36:558
Linkage map and markers
Streptomyces coelicolor, 37:371
Lipid metabolism
in mycobacteria, 36:65
Lipid production
in mycobacteria, 36:33
Lipids
cellular, 39:198
in biosynthesis of cell envelope, 35:14
membrane, 39:232
Lipopolysaccharide
biosynthesis of core region, 35:14
of *S. flexneri* O-antigen, 35:117
Live virus vaccines
potential hazards, 38:368
Living vaccines, 38:388
Lymphocytic choriomeningitis virus
serological evidence, 35:310
Lysosome role in infection
in cell-animal virus interactions, 37:103

Macrophages
antibodies, 35:365
bound immunoglobulins of, 35:365
Mannolipid biosynthesis, 35:14
Marburg virus
serological evidence, 35:310
Mechanism of paralysis
immunological, 35:267
Mechanisms of latency
herpesvirus, 38:338
Mechanisms of survival in thermophilic microorganisms, 37:320
Mechanisms of virus pathogenicity, 36:291
Membrane lipids
bilayer phase properties, 39:234
correlations, 39:240
regulation of physical properties, 39:247
Merismopedia, 35:171
Mesosomes, 38:405
Messenger ribonucleic acid
in animal viruses, 35:235
Metabolism
changes due to mycoplasma contamination, 35:206
Microbial growth rates
in nature, 35:39
Mimeae
nomenclature, 37:522
taxonomy, 37:522
Mitochondria
energy transductions in, 36:175
Molecular recalcitrance, 36:151
Molecular structure of bacterial plasmids, 36:361
Molybdoferredoxin
function in N_2 fixation, 36:248
Monkeypox virus
clinical and epidemiologic aspects, 37:1
epizootiology, 37:1
in humans, 37:1
in nonhuman primates, 37:1
infection by, 37:1
Mononuclear phagocytes, 38:376
Moraxella
nomenclature, 37:522
taxonomy, 37:522
Morphogenesis
in yeast cells, 35:149
M proteins, 38:57
antigenic properties, 38:58
biological properties, 38:58
chemical properties, 38:70
epidemiology, 38:67
immunological injury, 38:75
physical properties, 38:70
streptococcal infection, 38:67
type-specific antibody, 38:74
vaccines, 38:77
Mu endoxymbionts of paramecia, 38:119
Mycobacteria
intermediary metabolism 36:65
Mycobacterial lipids, 36:33, 65
Mycobacterium phlei
fatty acid synthetase of, 36:33
Mycolic acids, 36:37
Mycoplasmas
effects on cell cultures, 35:206
properties of, 35:206
Mycoplasmas
cell biology, 36:263

cytology, 36:264
subcellular organization, 36:268
Mycosides, 36:45
Myxoviruses
serological evidence, 35:310

Naturally occurring microorganisms
co-metabolism, 36:146
Neural tissue
herpesvirus infection, 38:342
Nitrogenase
compounds reduced by, 36:238
control of, 36:235
Nitrogen-fixing system
components of, 36:241
Nitrogen metabolism
in mycobacteria, 36:65
Nitrogenous oxides
assimilatory reduction, 37:409
dissimilatory reduction, 37:409
ecology of, 37:409
Nomenclature
botulinal toxins, 35:242
of blue-green algae, 35:171
simple toxins, 35:242
Non-neural tissue
herpesvirus infection, 38:342
Numerical techniques
for grouping, 35:379

O-antigen
biosynthesis, 35:14
of *S. flexneri*, 35:117
structure of, 35:117
synthesis, 35:14
Oral cavity
recurrent herpesvirus infections, 38:341
Order of genes
S. typhimurium, 36:558
Oxidative phosphorylation
in mycobacteria, 36:65

Papovaviruses
serological evidence, 35:310
Paralysis of mice
immunological, 35:267
Paramecia endosymbionts
alpha, 38:125
delta, 38:122
gamma, 38:122
kappa and pi, 38:119
lambda and sigma, 38:119
mu, 38:119
nu, 38:122
tau, 38:122
Paramecium aurelia endosymbionts, 38:113
Partial reagents, 36:339
Pathogenicity of virus, 36:291
Pedigree charts of *Escherichia coli*
conventions, 36:525
derivatives of strain AB1157, 36: before each p. 525
derivatives of strain P678, 525
derivatives of strain Y10, 525
derivatives of strains 58–161 and W6, 525
early Paris Lac$^-$ xt strains, 525
early Stanford and Yale strains, 525
Garen Pho$^-$ and Su$^+$ strains, 525
Hfr H, Thi$^-$, λ^-, and some derivatives, 525
miscellaneous Hfr strains, 525
strains K12S and 112, 525
wild-type derivatives, 525
Pedigrees
of *E. coli* mutant strains, 36:525
Penicillin
interaction with bacterial cell, 38:291
Penicillin-binding proteins, 38:296
Penicillin-sensitive enzyme, 38:306
Peptidoglycan synthesis, 35:14
Peptidoglycan types
cell walls of, 36:407
Phagocytosis
in cell animal virus interactions, 37:103
Phospholipids, 36:48
Photoautotrophic metabolism of blue-green algae, 37:343
Physiological aspects of cell division, 38:200
Picornaviruses
serological evidence, 35:310
Pi endosymbionts of paramecia, 38:119
Plasmids, bacterial, 36:361
Pneumonococcal polysaccharide antigens
mice with, 35:267
Poliovirus
molecular biology, 35:235
Polyene macrolide antibiotics
biology, 37:166; see Erratum, 37:407
chemistry, 37:166; see Erratum, 37:407
Polysaccharides
of *S. flexneri* O-antigen, 35:117
Poxviruses
serological evidence, 35:310
Precursor pools, 38:1
Pregnancy
influenza infections during, 38:356
Presidential address, 35:231
Primate infection by monkeypox virus
humans, 37:1
monkey, 37:1
Primates
capture and handling, 35:310
comparative virology, 35:310
Prokaryote ribosomal RNA
structure and synthesis of, 37:562
Prokaryotic organisms
gas vacuoles in, 36:1
Proteins
halophilic bacteria, 38:272
salt-dependent properties, 38:272
Proteins from thermophilic microorganisms, 37:320
Protein synthesis
bacteriophage, 36:109
Protoplasts
cell wall synthesis in, 35:149
of yeast, 35:149
Pseudomonas
catabolic pathways, 35:87
Psychrophilic bacteria
background information, 39:144

ecological distribution, 39:148
ecological significance, 39:149
growth, 39:150
physiology, 39:153

Queer reagins, 36:339

Rabies virus
serological evidence, 35:310
Rauscher murine leukemia virus
serological evidence, 35:310
Reagin detection, 36:341
Reagin production, 36:316
Reagins
human, 36:311
properties of, 36:324
Recurrent herpes virus infections, 38:343
Reductant
role in N_2 fixation, 36:246
Reduction of nitrogenous oxides, 37:409
Reovirus
protein synthesis, 35:250
RNA synthesis, 35:250
serological evidence, 35:310
Reproduction
role of cell wall, 35:149
Residue interactions
salt-dependent proteins, 38:278
Ribonucleic acid bacteriophage
translation of genome, 36:109
Ribonucleic acid coliphages
properties of, 36:110
Ribosomal ribonucleic acid of prokaryotes,
structure and synthesis of, 37:562
Ribulose diphosphate carboxylase evolution, 37:289
Rickettsiae
growth of, 37:259
metabolism of, 37:259
structure and chemical composition of, 37:259
Rifamycins
actions of, 35:290
Rous sarcoma virus
serological evidence, 35:310
Rubella virus
serological evidence, 35:310
Russian scientist
Ivanovski, Dmitri Iosifovich, 36:135

Saccharomyces cerevisiae
cell cycle coordination, 38:183
cell division control, 38:186
cell division cycle mutants, 38:167
component processes of the cell cycle, 38:171
integration of growth with division, 38:190
synchronous cultures, 38:165
Saccharomyces cerevisiae
cell wall synthesis in protoplasts, 35:149
Saccharomyces cerevisiae cell cycle, 38:164
SA11 virus
serological evidence, 35:310
Salmonella
antigenic comparison to *Shigella*, 35:117
Salmonella abony
F′, Hfr, and F′ strains, 36:608
Salmonella typhimurium
F^+, Hfr, and F′ strains, 36:608
linkage map, 36:558
Salt-dependency
proteins of halophiles, 38:272
Schizosaccharomyces pombe
cell wall synthesis in protoplasts, 35:149
Segmented ribonucleic acid viruses, 35:250
Selenomonads,
cytology of, 37:479
fine structure of, 37:479
growth of, 37:479
morphology of, 37:479
Selenomonas
classification, 37:479
growth, 37:479
structure, 37:479
Sexual progression
of the higher fungi, 36:156
regulation of, 36:158
Shigella flexneri
O-antigens of, 35:117
Simian hemorrhagic fever virus
serological evidence, 35:310
Solubilized antigens
chemical markers, 35:59
Somatic cell hybrids
use of for analysis of the differentiated state, 37:197
Sonic treatment
of transplantation antigens, 35:59
Staphylococcus aureus
antibiotic resistance plasmids of, 39:1
ecological relationship to man, 39:23
evidence for plasmid inheritance in, 39:3
hemolysins, 39:317
loss of plasmids from, 39:21
methicillin-resistant strains of, 39:17
relationship of antibiotic resistance to virulence in, 39:22
transfer of antibiotic resistance, 39:13
Steady-state populations, 35:39
Stereochemistry
of *S. flexneri* O-antigen, 35:117
Streptococcal M proteins, 38:57
Streptomyces coelicolor genetics
biosynthetic and dissimilatory pathways, 37:371
fertility system, 37:371
linkage map and markers, 37:371
Streptomyces mediterranei
rifamycins from, 35:290
Structure of bacterial plasmids, 36:361
Subcellular organization of mycoplasmas, 36:268
Subviral components
in cell-animal virus interactions, 37:103
Syngens of paramecia, 38:113

Tartrate pathway
in *Pseudomonas*, 35:87
Taxonomic implications
of peptidoglycan cell walls, 36:407
Taxonomy, numerical, 35:379
Teichoic acid biosynthesis, 35:14

Teichoic acids
immunological properties of, 37:215
Teratology, viral, 37:19
Thermophilic microorganisms
allosteric interactions, 37:320
mechanisms of survival, 37:320
proteins from, 37:320
Tissue cultures
contamination with mycoplasma, 35:206
T-lymphocytes, 38:381
Toxins, botulinal, 35:242
Transfer of resistance, 38:375
Transformation of energy
by bacterial membranes, 36:172
Translational control mechanisms
in infected cells, 36:125
Transplantation antigens, soluble
extraction, 35:59
Treatment of recurrent herpes virus infections, 38:345
Tricarboxylic acid cycle
in *Pseudomonas*, 35:87
Tryptophan synthetic pathway
description of, 39:88
evolution of, 39:105
evolutionary trends, 39:110
gene rearrangement in, 39:87
natural relationships, 39:107
Tumor viruses
crown gall, 39:186
RNA, 35:235

Uncoating
in cell-animal virus interactions, 37:103

Vaccines
induction of immunity, 38:388
live virus, 38:368
Vacuoles, gas, 36:1
Viral teratogens
diagnosis of in pregnancy, 37:19
Viral teratology, 37:19
Virion-associated enzyme activities
in cell-animal virus interactions, 37:103
Virology
a founder of, 36:135
Virulence factors
role in cellular immunity, 38:373
Virus-dependent modifications,
in cell-animal virus interactions, 37:103
Viruses, fungal, 38:29
Virus pathogenicity, 36:291

Wax D, 36:51

Yeasts
factors influencing composition, 39:209
lipid components, 39:199
lipids of, 39:197
